# Grafana Assignment Detailed Explanation with Screen shots
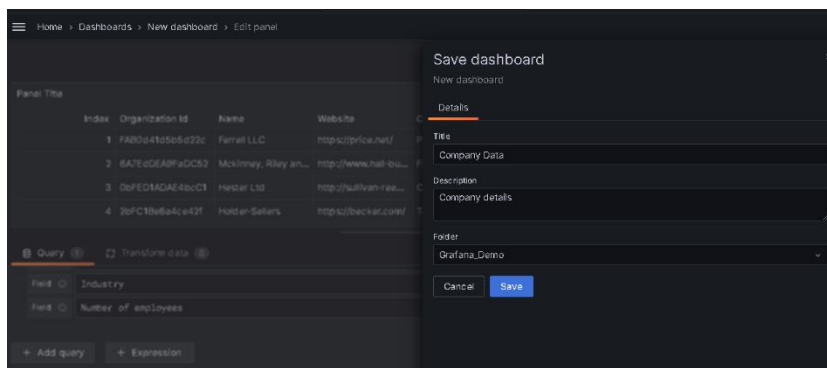

Data Source Creation

➢ To Export Data from our local machine we have to create data source by using Csv data.

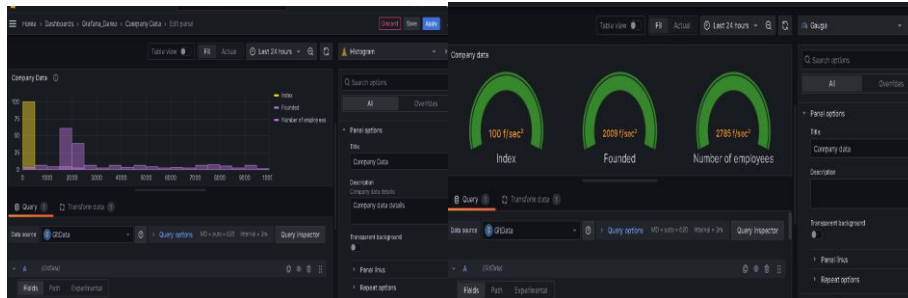

Dashboard Creation

➢ To create a dashboard for the exported data source.
➢ In that dashboard we can create multiple panels and we can edit dashboard according to our needs.
➢ While creating dashboard we have to select the folder where we have to save our dashboard and select our data source also.

Dashboard Panel Creation

➢ We can create panels according to our data source.

➢ In this project I created Histogram Gauge and table view.

➢ This will show the Time period data set graph or table etc.…

Final Dashboard Completion View

➢ In This section The Multiple panel we can view inside one dashboard.
